

You owe it to America to postpone action on the merger issue until after additional study has been made and the wishes of the majority of our people have been fully considered. It is a sin the way our communications have been trashed. Among others, I have been working on a plan to boycott all of the mass media and communicate through the internet. I no longer believe the "news". This proposed merger will only make things worse. History will judge any and all precipitous action in this regard.
